Rohan Kapil's Biography

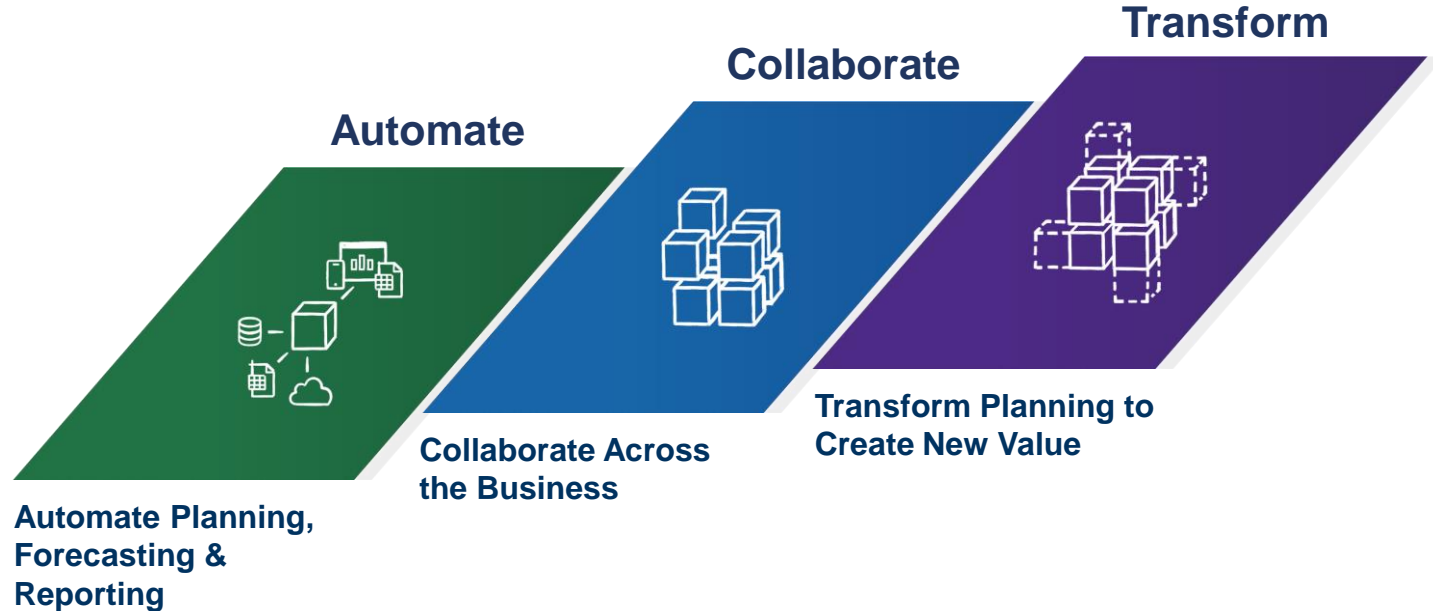

- Rohan Kapil is the Director of Customer Success for Jedox, Americas. He has 14 years of experience in the Enterprise Performance Management space solving critical financial planning and budgeting problems and executing complex projects to enable ambitious growth. Skilled at translating granular financial and non-financial information into actionable intelligence, he helps companies of all sizes enhance executive decision making and mitigate potential risks to improve business performance.
- Rohan holds a Master of Business Administration in Strategy and Finance and a Bachelor of Engineering in Computer Science.

Learning Objectives

1. Discuss the emergence of CFO 4.0 and Finance 4.0 and the impact on the finance function.
2. Explain Financial Transformation and the steps for implementation.
3. Identify data strategies that can help your organization achieve financial transformation.
4. Recognize the value of using modern techniques to enable proactive decision making.

About Jedox

Jedox Supports the Entire Journey to Digitalization

Agenda

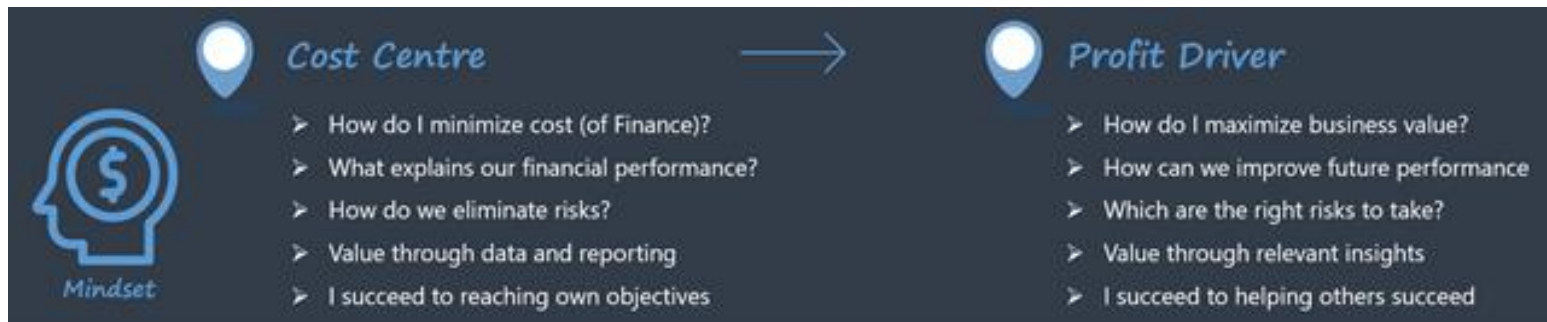

1. CFO & Finance - 4.0
2. Data Challenge
3. Data Strategy
4. Key Take Aways

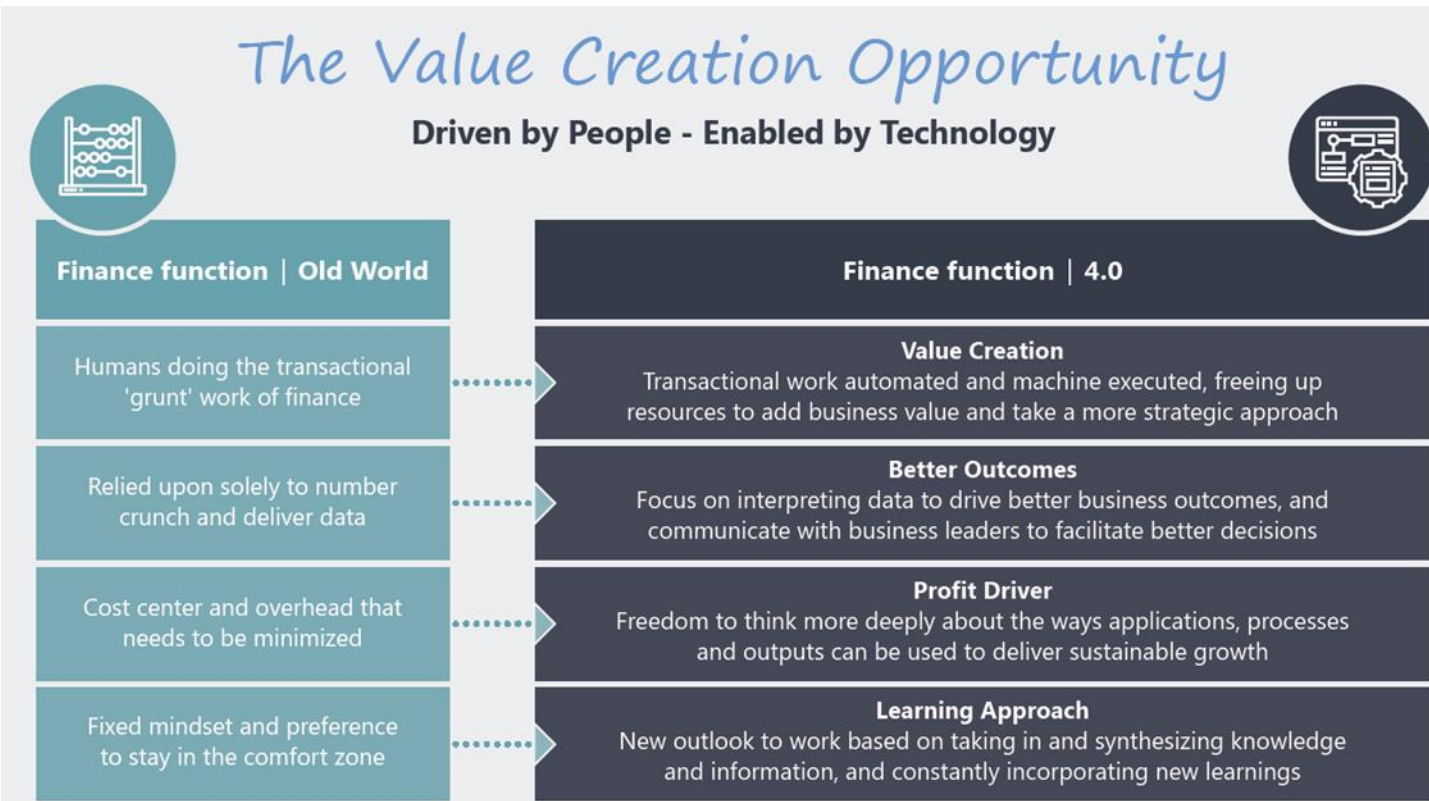

CFO 4.0

What is CFO 4.0?

- CFO needs to evaluate not only the overall corporate strategy, but also the many components of the organization from Sales to IT
- From cost center to profit driver

Alignment with Finance 4.0

New Pathways in Finance 4.0

Driven by People - Enabled by Technology

So what does this mean in practice for the new finance professional?
And how is value creation different in Finance Function 4.0?

Three Career Strands

Technical Accounting

Determine & Implement Standards
Create Technology-Enabling Processes
Perform Forward Planning

Data Science & Analytics

Dig Deep & Interpret Data
Use Advanced Technology & Tools
Human Intuition for the Organisation

Business Partner

Translate Data into Insight & Action
Focus on Communication & Signposting
Drive Decisions & Business Outcomes

The New Day-to-Day

Create business relationships at all levels

Develop a deep & wide understanding of the business

Design processes to produce valid & valuable outputs

Translate information into valuable new insight

Disseminate insights for better visibility into critical metrics

Signpost & drive better decisions & real-world outcomes

Finance Transformation 4.0

7 Pillars of finance transformation

**We can fulfil the potential of Finance Function 4.0
by agreeing on a transformation plan.**

Concrete **investment in automation** and other **digital transformation** activities

Human expertise able to operate in a field based on relationship building and value creation

Focus on **process design**, creating sensible and easily understandable processes

Transfer processes on to automated systems in order to **generate useful outputs**

Comprehensive gap analysis will determine the steps needed in order to get to the new operating model

Industry-wide and industry-standard **training and support** to put the right structures in place

Visible role models to help finance professional to make the leap and show them how to succeed

Poll Question 1:

What is the focus of your current finance transformation project?

- a. Financial Planning
- b. Accounting (ERP)
- c. Billing and Payment Processing
- d. Inventory Tracking
- e. Payroll Management
- f. Treasury
- g. None of the above

Poll Question 1 Results: (Placeholder)

Data Challenge

CFO's Data Challenges

1. Poor data quality
2. Difficulty accessing data
3. Multiple systems
4. Too much data
5. Different views of data
6. Data visualization

Data fragmentation is a top challenge for many CFOs.

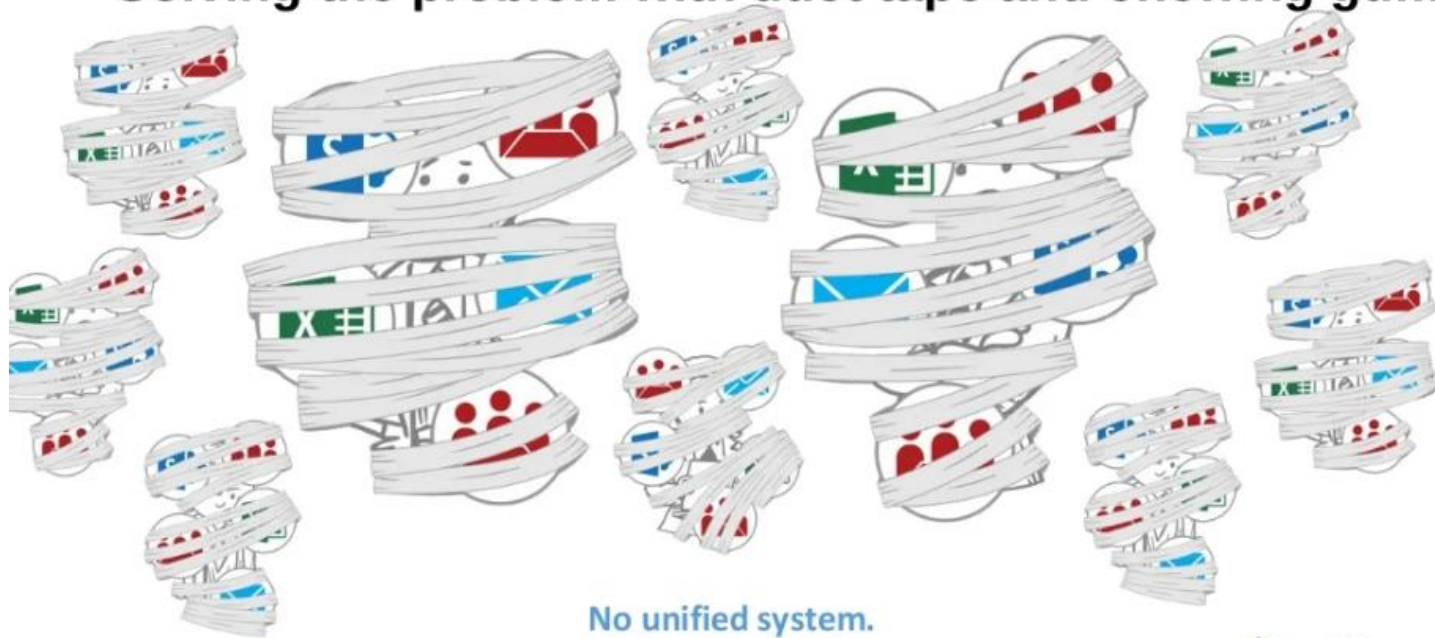

Top challenge for CFOs, % of respondents (n = 50)

Source: Findings from the private-equity CFO roundtable sponsored by McKinsey and the *Financial Times* in September 2019, with 50 respondents to a series of "pulse check" questions

How did we get here?

Solving the problem with duct tape and chewing gum

Poll Question 2:

What tools are you currently using for data management?

(please select all that apply)

- a. We use a data warehouse
- b. AI (machine learning) and ML (machine learning) are used
- c. Mostly Excel
- d. Another tool

Poll Question 2 Results: (Placeholder)

Data Strategy

Data Strategy - Introduction

- Supports business goals and stakeholders
- Fuels decision making analytics
- Encompasses governance
- Connects data, processes, technology, and people

Data Strategy – Guiding Principles

- Automation
- Audit and traceability
- Balance flexibility with complexity
- Tool investment

Data Strategy - Tools

Cloud Infrastructure

- Upgrade your computational footprint
- Elastic provisioning
- Security and data protection
- Outsource infrastructure

Data Strategy - Tools

Data Warehouse / Lake

- One source of truth
- Easier data access
- Mitigates data silos

Data Strategy - Tools

Data Integration (ETL)

- ETL = Extract Transform Load
- Data in place vs. moving data
- Files vs API/Direct connections

Data Strategy - Tools

AI and Machine Learning

- Data Preparation
- Error identification
- Manage and analyze vast quantities of data

“70% of enterprises expect to implement AI over the next 12 months.” Predictions 2018: The Honeymoon For AI Is Over, Forrester

Data Strategy - Tools

End User Tools

- Dedicated visualization tools
- Hybrid tools
- BI/Query tools
- Interactive/Data generation tools
- Things to look for when choosing a tool

Data Strategy – Common Issues

Poll Question 3:

What is your organization's biggest data challenge?

- a. Poor data quality
- b. Difficulty accessing data
- c. Multiple systems
- d. Too much data
- e. Different views of data
- f. Data visualization
- g. Something else

Poll Question 3 Results: (Placeholder)

Data Strategy – Solving Common Issues

Poor data quality

- Identify root causes
- Implement remedial processes
- Create automated solutions to root cause issues
- Create “one source of truth”

Data Strategy – Solving Common Issues

Difficulty accessing data

- Consider a data warehouse/lake
- Software Tools
- Cloud Infrastructure

Data Strategy – Solving Common Issues

Multiple systems

- Consider a data warehouse/lake
- System connectivity
- ETL

Data Strategy – Solving Common Issues

Too much data

- Use Cloud Infrastructure
- Look for minimum viable footprint (low Sparsity)
- Use data management best practices

Data Strategy – Solving Common Issues

Different views of data

- Create “one source of truth”
- Consider a data warehouse/lake
- Implement data procedures, standards, and audit
- Leverage automation
- Guide, audit, and control user inputs

Data Strategy – Solving Common Issues

Data visualization

- Invest in tools, training, and maintenance
- Ensure you utilize previously mentioned data strategy to underpin this effort
- Look for easy to use tools

Key Take Aways

Key Take Aways

- Data has enormous value
- A robust and flexible data strategy can help your business succeed
- Investment in tools and processes in data can have a hard to quantify, but large ROI
- Never lose sight of the end business focus of data strategy

Poll Question 4:

What best describes your organization's data strategy?

- a. We have a clear strategy that incorporates much of what we've covered in this session.
- b. Data strategy is a goal but is not yet defined or implemented.
- c. We load data into Excel and hope for the best.
