# About Presenter's Organization

Sage is the market leader for AI and machine learning-enhanced integrated solutions for accounting, payroll, and HR, supporting the ambition of the world's entrepreneurs.

Millions of small and medium-sized businesses trust Sage finance, HR and payroll software to make work and money flow.

By digitizing business processes and relationships with customers, suppliers, employees, banks and governments, Sage's digital network connects SMBs, removing friction and delivering insights.

# Agenda

1. Introduction
2. Why is Trust so Important?
3. Layers of Trust
4. Conclusions
5. Key take away

**”I don’t trust it”**

# Why is Trust so Important?

1. Digital transformation is accelerating
2. AI has a greater opportunity to do harm
3. Society has greater expectations and is more sophisticated
4. Customer trust has been abused
5. AI development requires customer participation

# LLMs like GPT Make Factual Errors and can reflect bias

- Without proper controls, these 'hallucinations' amount to a significant business risk
- Google's loss of ~\$100B in market cap in Feb 2023 following an error by its LLM-backed chatbot Bard

## What new discoveries from The James Webb Space Telescope can tell my 9 year old about?

Your 9-year old might like these recent discoveries made by The James Webb Space Telescope (JWST):

- **In 2023, The JWST spotted a number of galaxies nicknamed "green peas".** They were given this name because they are small, round, and green, like peas
- **The telescope captured images of galaxies that are over 13 billion years old.** This means that the light from these galaxies has been traveling for over 13 billion years to reach us.
- **JWST took the very first pictures of a planet outside of our own solar system.** These distant worlds are called "exoplanets" Exo means "from outside"

**These discoveries can spark a child's imagination about the infinite wonders of the universe**

ChatGPT learned how to write by examining millions of pieces of writing on the Internet. Unfortunately, believe it or not, not everything on the internet is true! "it wasn't taught to understand what is fact, what is fiction, or anything like that," Gebru said. "It'll just sort of parrot back what on the Internet"

Timnit Gebru, AI Ethics Researcher

# Poll Question 1:

How would you feel about AI-generated financial reports in accounting?

- a. Fully trust them – AI can enhance accuracy and efficiency
- b. Cautiously optimistic – AI can help, but human oversight essential
- c. Neutral – Could be useful, but I'd need to see more proof
- d. Uncomfortable – I wouldn't trust AI-generated financial reports

# Poll Question 1 Results: (Placeholder)

# Layers of Trust

**Create Trust**

**Trust the company**

**Trust the tech**

**Table Stakes**

# Table Stakes

# Table Stakes

## **Data Privacy** Regulations

GDPR, CCPA, HIPAA, COPPA, PIPEDA, DPA 2018, POPIA

## **Cyber Security** Regulations

PCI-DSS, ISO/IEC 27001, NIS Directive, FISMA, CMMC, SOX, GLBA, HITECH

## **AI Governance** Frameworks

NIST AI Risk management, OECD AI Principles, EU Ethics guidelines

Trust the Tech

# Unintended Outcomes

## Poll Question 2:

What most concerns you about implementing AI in financial workflows?

- a. Data privacy and security risks
- b. Costs and complexity of implementation
- c. Lack of expertise
- d. Transparency and accuracy of insights
- e. Regulatory and compliance challenges

# Poll Question 2 Results: (Placeholder)

# Ethical AI

~~**Move fast and break things**~~

**Humility**

**Accountability**

# Are you qualified to tackle this problem without causing harm?

**01** Articulate clear principles defining what you will and will not do with AI.

**02** Establish advisory councils.

**03** Engage an AI Auditor.

# Product Development Considerations

Don't use AI when  
traditional  
programming will  
work.

```
isVideo = ( type == "image" ) || ( $.inArray( extension, [ "youtube.com/embed/" ] ) > -1 )
isUrl = ( type == "url" ) || ( !tagName || !isVideo || !isImage )
isElement = ( type == "element" ) || ( !tagName || !isVideo || !isImage || !isUrl )
isObject = ( typeof subject == "undefined" ) ? false : true

// Check if boxer is already active, return false
if ( $("#boxer").length > 1 ) {
    return;
}

// Kill event
_killEvent(e);

// Cache internal data
data = $.extend( {}, {
    $window: $(window),
    $body: $("body"),
    $target: $target,
    $object: $object,
    visible: false,
    resizeTimer: null,
    touchTimer: null,
    gallery: {
        active: false
    }
} );
```

# UX Design

Shift design  
objective from  
**productivity** to  
**confidence**

# UX Design

What is the AI benefit?

**Accuracy or productivity?**

Feel in  
Control**

## Poll Question 3:

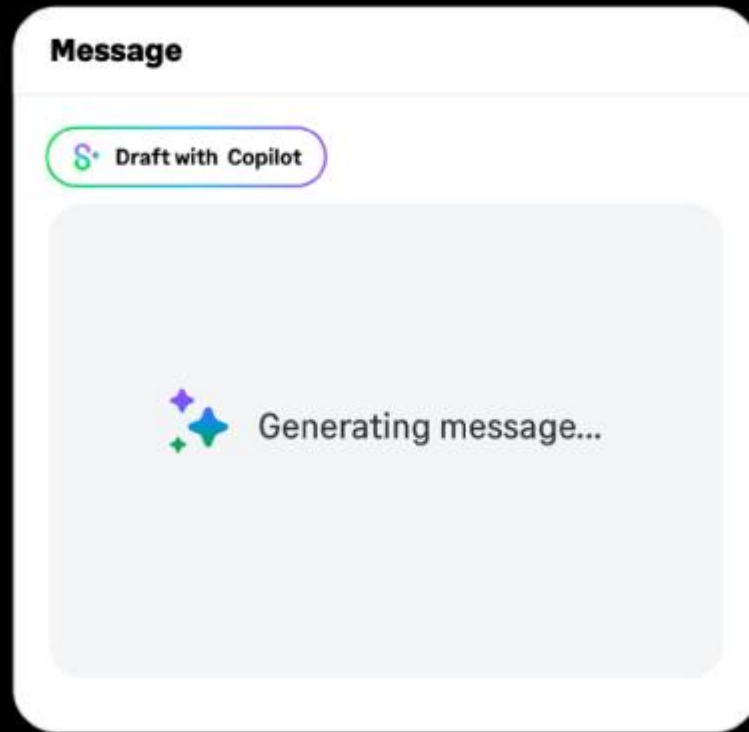

Which areas of finance would benefit the most from AI-driven automation?

- a. Fraud detection and prevention
- b. Compliance and regulatory reporting
- c. Financial forecasting and analysis
- d. Audit and risk management
- e. Routine bookkeeping tasks

# Poll Question 3 Results: (Placeholder)

# Draft email with Sage Copilot

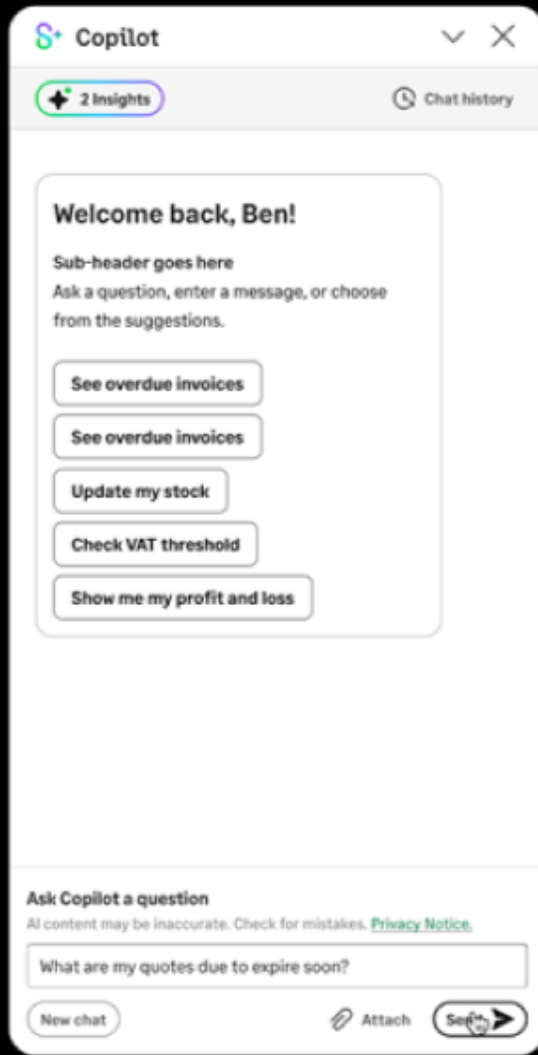

# Follow Transparent AI Guidelines

- Explainability and Transparency
- Human-centered design
- Bias and Fairness
- Transparency of Data Use
- Privacy and Security
- Accountability and Auditability

# Sage Copilot response explanation

“We will never use AI in a way that erodes  
your trust in Sage or our products.”

Trust The Company

**40% of market  
value destroyed**

**“Data is our most valuable asset. Access to that depends on customer trust.”**

Transparency, authenticity, and  
accountability

Know Your Customer

## Poll Question 4:

What would increase your trust in AI the most?

- a. Better regulation and oversight
- b. Improved user education
- c. Clearer communication about AI's limitations
- d. Increased transparency of algorithms

# Poll Question 4 Results: (Placeholder)

Use Tech to Create Trust

# Trust is Valuable

## **Size of the Audit Industry. \$217B Globally in 2021**

- Only point in time trust.
- After the fact.

## **Credit Card trx fees**

- Effectively a 1.5 – 3.5% regressive tax.

Trust as a differentiator

A close-up photograph of a person's face, partially obscured by a white iPhone 11 Pro Max. The person's eyes are closed, and their hands are holding the phone in front of their face. The phone's camera system, including three lenses and a flash, is clearly visible. The background is dark, making the white phone and the person's face stand out.

**Privacy. That's Apple.**

01 Outlier Detection

02 Quality Assurance

03 Cyber Security

Digital Workflows:

Employment  
Verification

# A Better Result

“Outlier detection is hands down my favorite thing that Sage Intacct has done so far. It allowed us to catch an overstatement of revenue of about \$350k before it was in the books.

Now the entire company trusts the finance organization and the numbers that are in Sage Intacct. It’s really moved us into that advisory role.”

**Erin Horak** • 2nd

VP of Finance at VRC Investigations (Veracity Research Co.)  
Eules, TX
